

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy Law protections. Since we put our name on the list, the number of unwanted/unsolicited phone calls has decreased from 5-6 per night (sometimes even more than that, and usually always at supper time or 8:55 pm) to zero. I would certainly rather deal with the 5-6 credit card offerings per day than the phone calls! Don't let these companies invade our privacy again!
